Реализация последовательности

Интерфейс -> Абстрактный класс -> Kласс Connect -> class Form

```
Интерфейс
using System;
namespace DataBaseTest
  interface InterfaceMay
    void sidu_Interface(string sql);
}
Абстрактный класс
using System;
namespace DataBaseTest
  abstract class ConnectAbs: InterfaceMay
    public void sidu_Interface(string sql)
      throw new NotImplementedException();
Класс Connect
using System;
using MySql.Data.MySqlClient;
using System.Data;
using System.IO;
namespace DataBaseTest
{
  class Connect: ConnectAbs
    public MySqlConnection con;
    public MySqlDataReader dr;
    MySqlCommand cmd;
    StreamReader sr:
    public Connect()
       sr = new StreamReader("stringConnect.ini");
       connectStringg = sr.ReadLine();
    }
    new public void sidu_Interface(string sql1)
      con = new MySqlConnection(connectStringg);
      con.Open();
       MySqlCommand cmd2 = con.CreateCommand();
```

```
try
         cmd2.CommandText = sql1;
         cmd2.ExecuteNonQuery();
         con.Close();
         MessageBox.Show("Успешно");
      catch (Exception ex)
         MessageBox.Show(ex.Message);
    }
  }
}
class Form
using System;
using System. Windows. Forms;
namespace DataBaseTest
{
  public partial class Form3: Form
    Connect con = new Connect();
    public Form3()
      InitializeComponent();
